

## Eurobar Conference in Brussels

October 9 – 10, 2024

The Eurobar Conference took place on October 9-10, 2024, in Brussels, bringing together 18 participants from 7 European Transmission System Operators (TSOs). The event served as a platform for networking and exchanging insights on current challenges and developments in the offshore energy sector. Participants engaged in discussions covering a range of topics, including marine cable protection, future offshore grid design, the conservation and recovery of maritime habitats, and offshore substation development. The positive feedback from attendees highlighted the Eurobar Conference as a valuable opportunity for sharing ideas and strengthening collaboration among European TSOs. As a result, the conference will be held annually to continue fostering dialogue and innovation.
